Stephen Wolverton, MD  Professor of Clinical Dermatology, Indiana University School of Medicine
Jashin J. Wu, MD  Los Angeles
Paul Yamauchi, MD, PhD  Clinical Assistant Professor of Dermatology David Geffen School of Medicine at UCLA

Statement of Learning Objectives

General Dermatology:
• Discuss recent evidence related to diagnosis and treatment of skin diseases in both the general population and the elderly.
• Describe new diagnostic tools and evidence-based treatment options for patients with melanoma.
• Identify novel targets in acne treatment and the potential role of probiotics in managing acne vulgaris.
• Demonstrate an understanding of dermatopathology evaluation and the steps to an accurate diagnosis.
• Review basic business principles and tools for ensuring practice stability, including monitoring online presence and maximizing social media and other online opportunities.
• Define relevant and current updates to key coding and billing strategies specific to dermatologists.
• Compare and contrast the benefits, risks, and costs involved in the different treatment options for psoriasis.
• Explain how to analyze patient medications, comorbidities, and dermatologic needs, in order to avoid adverse drug interactions.
• Assess how new information related to hair follicle biology can enhance or improve treatment of the most common types of hair thinning and loss.
• Summarize the diagnostic and triage algorithms for dermoscopy.
• Describe how photodynamic therapy (PDT) works and in which cases this therapy might be appropriate.
• Distinguish the role of the microbiome, its benefits and risks of probiotic use.

Pediatrics/Special Populations:
• Review current updates on pediatric study data and how they may impact treatment protocols.

Cosmetic:
• Explain the uses for microneedling and key patient selection criteria.

Surgical:
• Recall evidence-based practices related to new surgical techniques for medical and cosmetic procedures.
• Review potential benefits and risks of the most common dermatologic surgeries.
Continuing Medical Education Certificate:
The CME certificate is generated online after you complete an evaluation prepared by Medical Education Resources (MER). You will be sent an email from MER with a link to the online evaluation form – once you complete the form there will be instructions on how to download your certificate. If you do not receive the email and link from MER, please contact CalDerm via email at membership@calderm.org.

You can also access the online evaluation directly at this URL: https://www.cmesurvey.site/CALDERM

Accreditation Statement
This activity has been planned and implemented in accordance with the accreditation requirements and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint providership of Medical Education Resources (MER) and the California Society of Dermatology & Dermatologic Surgery. MER is accredited by the ACCME to provide continuing medical education for physicians.

Designation Statement
Medical Education Resources designates this live activity for a maximum of 15 AMA PRA Category 1 Credit(s)™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Needs Assessment
The 2018 CalDerm Symposium is designed to meet the evolving educational needs of board certified dermatologists, dermatologic surgeons and allied health professionals who practice primarily in the state of California. This activity has been designed to meet the educational needs of dermatologists.

Disclosure of Conflicts of Interest
It is the policy of Medical Education Resources to ensure balance, independence, objectivity, and scientific rigor in all of its educational activities. In accordance with this policy, MER identifies conflicts of interest with its instructors, content managers, and other individuals who are in a position to control the content of an activity. Conflicts are resolved by MER to ensure that all scientific research referred to, reported, or used in a continuing education activity conforms to the generally accepted standards of experimental design, data collection, and analysis.
